

KID WARRIOR MULTIVITAMIN

Our Kid Warrior Multivitamin is formulated to address children’s unique nutritional needs for growth, development, and vitality – helping to close the nutritional gaps that commonly result from suboptimal childhood diets. Each tasty tablet provides 23 important vitamins and minerals in active, highly bioavailable forms and is free of artificial colors, flavors and preservatives. Ideal for children and adolescents who cannot swallow capsules, implementing these healthy habits at such a young stage can help normalize a proper life-long health routine.

CLINICAL APPLICATIONS

- Creates a healthy immune system to ward off illness
- Enhances cognitive abilities & balances energy levels
- Strengthens bones & joints to support overall growth
- Supports liver, aids in digestion & nutrient absorption

Discussion

Good nutrition in childhood and adolescence is essential for achieving optimal growth and normal development. It also greatly impacts overall health and well-being, including resistance to infection and achieving peak bone mass. Not only does good nutrition impact health, but it also influences socialization, self-esteem, and academic performance.

Finding a children’s multivitamin and mineral formula that compromises nutrients in their most highly absorbable form, is free of toxic additives and preservatives, and tastes great without artificial flavors can be challenging. This is why the Kid Warrior Multivitamin does not contain gluten, wheat, yeast, soy protein, egg, milk, shellfish, peanuts, tree nut or high-fructose corn syrup ingredients. This product is safe for kids with these specific sensitivities, as well as for children with MTHFR gene variants.*

WARNING: Accidental overdose of iron-containing products is a leading cause of fatal poisoning in children under 6. Keep this product out of reach of children. In case of accidental overdose, call a doctor or poison control center immediately.
